## Our Mission

The Central Virginia Burn Camp is a summer camp dedicated to providing a special, fun and safe experience for children with burn injuries. This camp offers the chance for these children to enjoy fun summer activities with others who have gone through a similar experience. The Camp's positive and supportive environment helps to foster a sense of self-confidence, increases self-esteem, and allows the children to realize they are not alone with their burn scars.

## Our History

The Central Virginia Burn Camp was founded in 1994 by Burn Care professionals including firefighters, therapists and nurses. While we have grown in size over the years, we remain a small camp, committed to providing individualized activities and attention to each camper.
